

## BLUE HEAVEN SUBWOOFER CABLE

When it comes to high quality music reproduction, all frequencies must be addressed. Only by adding quality, hifi-caliber cabling to a subwoofer, can one experience the energy and emotion conveyed in every aspect of auditory entertainment, whether music, movies, or television. The Blue Heaven Subwoofer Cable enables hifi enthusiasts to completely integrate their subwoofers with their loudspeakers to create a truly well-rounded experience, highlighting even the lowest frequency extensions on the spectrum.

The Blue Heaven Subwoofer Cable consists of four, 22 AWG, solid core, silver-plated, 99.9999% OFC signal conductors. Nordost's newest subwoofer cable employs an innovative precision FEP extrusion process, which improves the dielectric strength of the cables greatly, in order to increase signal speeds and accuracy in signal transfer. The conductors are then covered in a braided shield, addressing any EMI and RFI. Additionally, the Blue Heaven Subwoofer Cable utilizes a unique flat, parallel construction.

The first two options available are used for typical LFE or .1 home theater usage. The first option, "Straight", is the standard connection when using a mono setup for the LFE input of a subwoofer. In this case, the Blue Heaven Subwoofer Cable "Straight" is terminated with one connector on each end. The second option, "Y", is needed when connecting your mono LFE to both channel inputs on your subwoofer. The Blue Heaven Subwoofer "Y" is terminated with one connector on the processor end and two connectors on the subwoofer end. The last option, "Y to Y" is necessary in a pure two channel setup. The Blue Heaven Subwoofer "Y to Y" is terminated with two

connectors on the preamp end and two connectors on the subwoofer end.

Designed, manufactured, and hand-terminated entirely in the USA, the Blue Heaven Subwoofer Cable guarantees the accurate construction required to produce integrated low level frequencies while preserving the precision and speed necessary for a well rounded, seamless, all-encompassing sound.

- Fully manufactured and hand terminated in the USA
- Fluorinated Ethylene Propylene (FEP) insulation
- 4 x 22 AWG, silver-plated, 99.9999% OFC, solid core conductors
- Flat, Parallel construction
- Braided Shield
- RoHS Compliant
- RCA or XLR termination
- Straight, Y, or Y to Y configuration
