

# LEIFSTYLE TONEARM CABLE

The **Leifstyle Tonearm Cable** is a unique, simplified version of a Nordost tonearm cable, offering analog enthusiasts the chance to experience Nordost's innovative technology in their home sound system at an incredible value.

Like its more advanced counterparts, Nordost's Leifstyle Tonearm Cable is made up of two, individually shielded, twisted conductor pairs. This sophisticated and time-tested cable geometry separates the pairs of 28 AWG solid core, silver-plated conductors that make up its left and right channels, effectively minimizing inter-channel crosstalk. Additionally, Nordost's introductory Tonearm Cable includes a ground whip to eliminate any noise introduced during signal transfer.

Understanding the importance of a tonearm cable in any analog audio setup, Nordost crafted this cable with a purpose-built, low-capacitance design, essential for achieving authentic and natural vinyl sound reproduction. With the Leifstyle Tonearm Cable, you can afford to enjoy the high-quality sound you crave.

## SPECIFICATIONS

- **Conductors:** 4 x 28 AWG
- **Construction:** Twisted conductor pairs make up left and right channels, each shielded with a braid shield
- **Material:** Silver-plated 99.9999% OFC, Solid Core conductors
- **Ground / Bond Wire:** 24 AWG, OFC, 19/36
- **Termination:** Gold-plated Din, RCA, or XLR connectors. Ground/bond wire terminated with gold-plated 5mm spades.
