

# WHITE LIGHTNING 3 POWER CORD

## EXPANDING THE “POWER” OF LEIF 3

The White Lightning 3 Power Cord is an essential, high-performance component for any audio system requiring a Figure-8 connection. Nordost's new, introductory power cord delivers sturdy, reliable AC power while minimizing the harmful effects of electromagnetic interference (EMI) and radio frequencies (RF). This ensures a clean, stable current for optimal audio performance.

The White Lightning 3 Power Cord features Micro Mono-Filament construction, 18 AWG OFC conductors, and FEP insulation, all of which immediately enhance the clarity, depth, and dynamics of your music.

What sets the White Lightning 3 Power Cord apart is its sleek Figure-8 connector, specially designed by Nordost. This termination is the perfect match for systems that use Figure-8 connections, allowing music lovers to bring the “power” of Leif 3 to popular lifestyle brands.

Whether fine-tuning a casual setup or creating a more immersive listening experience, The White Lightning 3 Power Cord provides the essential foundation for superior sound quality. It allows your audio gear to perform at its best. The White Lightning 3 Power Cord is the first step in transforming the sound of your home system—bringing music to life like never before.

## SPECIFICATIONS

- **Insulation:** Low dielectric Fluorinated Ethylene Propylene (FEP)
- **Construction:** Proprietary Micro Mono-Filament Design
- **Conductors:** 2 x 18 AWG
- **Material:** 65 Strand 99.9999% OFC
- **Capacitance:** 10.0pF/ft
- **DC Resistance:** 6.6 Ohms per 1000ft
- **Termination:** US (Nema), EU (Schuko), UK or AUS to Figure 8 IEC-C7 connector
